

**Blaine House Conference
on Natural Resource-based Industries:
*"Charting a New Course"***

Conference Report Available

Thank you once again for your role in the Blaine House Conference on Maine's Natural Resource-based Industries on November 17, 2003. We are pleased to inform you of the release of the Conference Report, which lays out 75 recommendations to strengthen Maine's aquaculture, fishing, farming, forestry, and tourism businesses. The Conference Report was delivered earlier this week by the Planning Committee to Governor John Baldacci, who intends to make these recommendations part of his legislative, policy, and administrative agenda. We deeply appreciate your contribution this to entire effort, which the Governor has promised to maintain.

The report may be downloaded from the Governor's website, as follows:

www.state.me.us/governor/baldacci/news/events/natres_conference_1003.html
